SPECIFICATIONS

Overview

Ruggedly built of foam cored fiberglass to the highest international standards, Sensei was born again in 1996 when she went through a 13' (4 m) extension and interior transformation. This was done to the lines of Glade Johnson Design, in the Pacific Northwest yard of Admiral Marine, world famous for their skillful fiberglass composite work. In 2006/2007, ten years after, the extensive refit just completed in famous Benetti Shipyard in Italy gave to Sensei another life: you will fall instantly in love with the extraordinary environment produced by the lines of famous interior designer OU BAHOLYODHIN who left intact the light exotic touch (SENSEI means Master in Japanese). From her flybridge and mast, through her interior, and down to her added extension of decks and upper lounge, every detail was intimately scrutinized to maximize the relax and comfort of the guests. Even in her engine room, major systems were replaced or upgraded with more reliable but less noisy systems. A great layout, with a huge "terrace/flybridge", a cozy and warm sky lounge and both exterior and interior dining areas, four guest cabins and an on-deck master, are all made possible by the great 27' (8.2 m) beam. The powerful boat deck davit can lift tenders and toys off to either side of the yacht from the boat deck. The huge transom platform performs a large shower for rinsing off prior to going on board after the beach or a swim. Serious improvements to charter logistics were anticipated in the refit of Sensei. This requirement is complemented by a great professional galley, and tremendous storage with abundant refrigeration and freezer space.

Basic Information

Category: Motor Yacht

Sub Category: Displacement
