Fuel Type: Diesel

DETAILED INFORMATION

Hull Construction

All resins used in the construction are modified epoxies and/or vinylesters and the core materials in all hull and structural areas are closed cell PVC foam. Fabrics are generally E glass with a Kevlar hybrid used on the outside skins of the hulls, and carbon fiber pads in selected high stress areas. All panels are hand laid and vacuum bagged to ensure correct resin/fabric saturation and mix. Test panels are taken throughout the construction of the vessel. The composite engineering of all the structural components of the vessel has been designed generally in accordance with DNV classification rules for unrestricted service.

Exclusions

Owner's personal belongings. Owner's personal toys, including but not limited Jet-skis, Tenders, Sea Bobs, Fishing & Diving equipment.
